Impulse "All-In-One" Roller Shade Measuring Instructions

Important:

- All shades are custom-made and non-refundable.
- Do not order by material width. Order by overall final assembly width.
- Record all measurements in inches and fractions. Round to the nearest 1/8th of an inch.

STEP 1:

- Measure the window width dimension outside frame to outside frame. **(W)**

Width **(W)** = _____

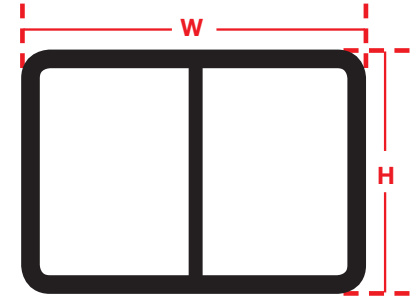

- Add 2.5" to your outside frame to outside frame width dimension.

Width **(W)** + 2.5" = _____ = **Final Overall Assembly Width**
(Use this measurement as your width when ordering.)

Note:

- The additional 2.5" is to allow for clearance of the window frame for installation.
- Shade material width will be 2" less than the overall final assembly width.

Impulse Roller Shades are for Outside Mount Applications Only

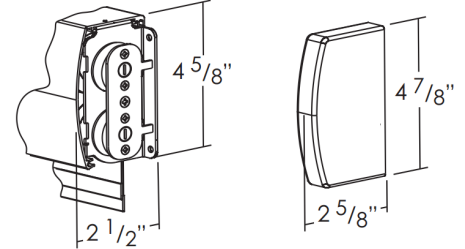

STEP 2:

- Measure the window height dimension **(H)**. _____

Note:

- If the shade is going to be mounted above the window be sure to measure starting where your shade will set above the window.

Mounting Bracket and End Cap Dimensions

STEP 3:

- Measure again to confirm dimensions are accurate.

Please make sure you measure carefully so that the entire window is covered and fits properly into the mounting location.

Final Measurements: $(W + 2.5")$ _____ x (H) _____
